

COLLEGE BOT

Schedule Chart with milestones and deliverables

Kushal - 18BCE0557

The College bot project is built using artificial algorithms that analyses user's queries and understand user's message. This System is a web application which provides answer to the query of the student. Students just have to query through the bot which is used for chatting. Students can chat using any format there is no specific format the user has to follow. The System uses built in artificial intelligence to answer the query. The answers are appropriate what the user queries. The User can query any college related activities through the system. The user does not have to personally go to the college for enquiry. The System analyses the question and then answers to the user. The system answers to the query as if it is answered by the person. With the help of artificial intelligence, the system answers the query asked by the students. The system replies using an effective Graphical user interface which implies that as if a real person is talking to the user. The user just has to register himself to the system and has to login to the system. After login user can access to the various helping pages. Various helping pages has the bot through which the user can chat by asking queries related to college activities. The system replies to the user with the help of effective graphical user interface. The user can query about the college related activities through online with the help of this web application. The user can query college related activities such as date and timing of annual day, sports day, and other cultural activities. This system helps the student to be updated about the college activities.

College Bot Question 20

Schedule Chart with Milestones

Milestones have importance for the Product Development Team

Identifying Milestones:

- Can be conceptual or tangible
- Signals the reaching of a key stage in the project
- An important sign for the team
- A point for project management to check project goal alignment

Schedule Chart with Deliverables

Deliverables have importance for the Client

Identifying Deliverables:

- Must be tangible (i.e. a product or service)
- Signals the completion of a project phase
- An important sign for the client
- A point for the client to sign-off on project status
